

## PREVENTIVE HEALTHCARE

Dear ladies and gentlemen,

with this short information, we provide you with a list of preparations, which have proven useful supplements within the context of antibiotic treatment. Some customers of ours have already informed us, that the recommended combinations have been used successfully.

**Please note that the patients have to cover the cost for the preparations.**

### Supportive medication during antibiotic treatment

#### In case of gastrointestinal problems:

**Jalapa Comp. drops** (20/50 ml)

Acute 6 × 5 drops per day, after improvement 3 × 5 drops per day  
(PZN-number 7433914)

### Supportive medication after antibiotic therapy

#### **SYXYL BioCult comp. to restore and protect the intestinal flora**

50 or 100 tablets (3 × 2)  
(PZN-number 6151763)

and

**Hevertotox cold tablets** (4 × 2, children 3 × 1)

40/100 or 200 tablets  
(PZN-number 1173688)

These should be taken from the **4th day** after the end of antibiotic treatment. Please enquire the current price of your pharmacy.
